

PhoneUP Conference

Advanced Conferencing for Cisco UCM

- schedule with MS Outlook and web
- protect meetings with PIN and Caller ID
- use dial-out to add attendees automatically

Schedule and protect

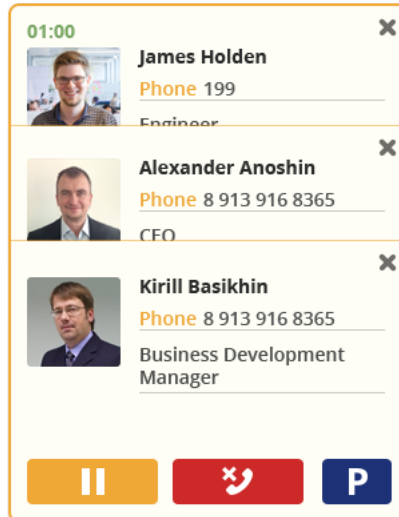

PIN-secured meetings

Use MS Outlook Add-In or personal web-calendar to schedule PIN-protected meetings. Each attendee will receive an invitation with instructions on how to join. Unique PIN will secure your conference.

Protection by Caller ID (ANI)

For regular meetings with your team create secure dedicated rooms protected by Caller ID. Only phone numbers you configure will be able to join such a room.

Conference control

01:00		James Holden Phone 199 Engineer	X
		Alexander Anoshin Phone 8 913 916 8365 CEO	X
		Kirill Basikhin Phone 8 913 916 8365 Business Development Manager	X

Control buttons: || (Pause), X (Disconnect), P (Mute)

Use PhoneUP Console to control your conference:

- see who's joined,
- add more parties with a single drag-n-drop,
- disconnect any participant.

And more...

Dial-out

Instead of having everyone remember to dial in, PhoneUP Conference dials everyone into the conference automatically.

Meeting recording

Record your meetings with PhoneUP Record, configuring total or on-demand recording.
