

# Aurus PhoneUP

## Single Sign-On for CUCM Extension Mobility

PhoneUP EM SSO module allows employees to authorize on IP phone with Extension Mobility automatically without entering their personal User ID or PIN.

### Login and logout automatically

PhoneUP EM SSO tracks AD (or LDAP) log-in / log-out events and changes the Extension Mobility profile of company IP phones accordingly.

### Easy to deploy and maintain

PhoneUP EM SSO resides on a PhoneUP server and does not require any software to be installed on company PCs. The real-time report is available for admin to control EM profiles used among the communication network:

Device name	Phone number	Workstation ID	Currently logged in	Last logged in	#
SEP501CBFFD165F	1482	PC8819	johnson	allen	
SEP449UB587DYNT	3357	PC5621	davis	johnson
